

ROADWARRIOR is an ecosystem for operations and management of staff using mobile staff to do business at the customer interface. Our solution can help managers and administrators respond to, report on, and analyse mobile personnel's activities.

This results in improved service delivery and efficiencies from your workforce and demonstrates mindset leadership to your customers.

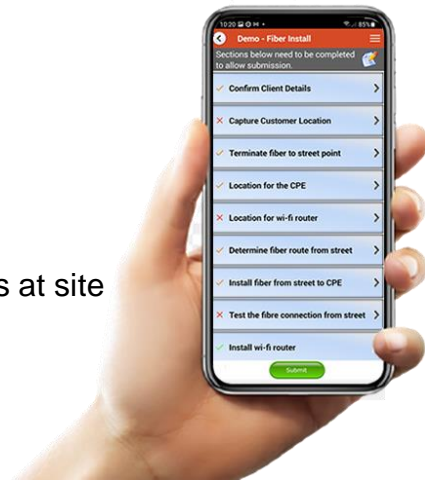

The solution captures relevant data using the components in the **ROADWARRIOR** cloud-based servers.

How does it Work ?

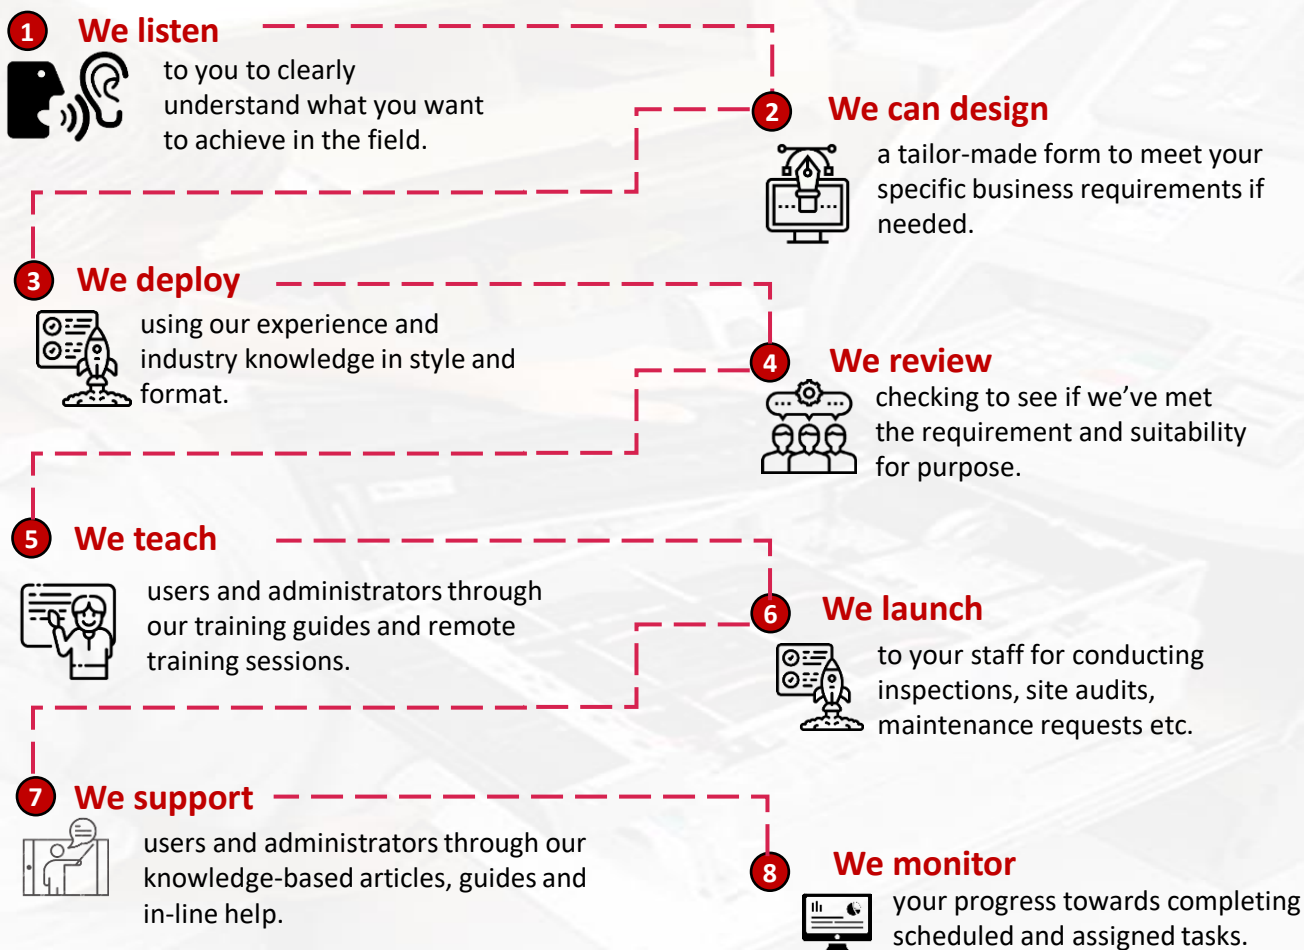

ROADWARRIOR provides a set of tools which allows you to:

- Accelerate digitising of data captured at source
- Manage your mobile sales and service operations
- Track your team in real-time
- Capture on-site visits electronically with automatic upload
- Produce Quality inspections, Orders or complete Job Cards at site
- Plan and Monitor routes taken
- Track devices and their usage
- Distribute instructions
- Dashboard key activities for display

How do we engage ?

By using the collected data you are able to track performance at individual or group levels for performance/dismissal reviews, incentive programs and efficiency audits. Improve efficiency, accountability and profitability by managing your workforce with intelligent software and mobile devices.
